Fourth grade created and programmed a Lego mini-golf challenge for a hole in one. By doing this they learned the relationship between an object's speed and it's energy.

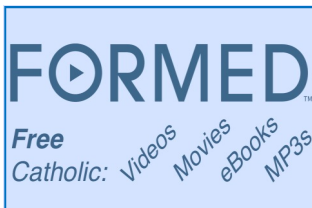

Kindergarten, under the direction of Mrs. Valbuena, participated in a fun science lab showing water displacement. They made educated hypotheses about how many paper clips it would take to overflow a cup filled to the brim with water. After discussing how water molecules stick together and are cohesive, each student gave an estimate ranging from 1-2,000! We were all surprised (even the teachers!) that it took 145 paper clips to cause the overflow.

TOGETHER we live, pray, learn and serve, **TOGETHER** we make a difference.
